

## **Unmetered Policy**

For packages supporting unmetered disk space or data transfer (bandwidth), we do not have defined limitations. These resources are "unmetered", meaning you are not billed according to the amount of disk space or bandwidth used. While of course these resources are not infinite, we believe our customers should have all the resources necessary to build an online presence and 99.95% of customers will have more than enough disk space and bandwidth to meet their needs.

That said, we do require all customers to be fully compliant with our Terms of Service and utilize disk space and bandwidth in a manner consistent with the normal operation of a website. While rare, we occasionally constrain accounts utilizing more resources than should be the case in the normal operation of a personal or small business website.
